

Advantages of Fiber Optic Ethernet

SPEED

Fiber Ethernet is fast, with speeds of up to 10 Gbps

DURABILITY

Thinner, lighter and sturdier than copper cables

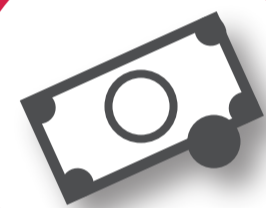

SIGNAL CLARITY

Clearer, more reliable signals than copper cables

COST

Smart future-proof business investment to save both time and money

DISTANCE

Fiber optic cables can transmit data up to 25 miles

SECURITY

Much more difficult to hijack than electric signals, insuring data integrity

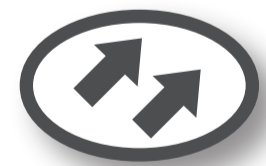

BANDWIDTH

Substantially more bandwidth relative to cable diameter than copper

SCALABILITY

Easily scaled to meet the evolving needs of your business
